BID # 2015-59
PROFESSIONAL ENGINEERING RFQ
WILL COUNTY, ILLINOIS

JULY 15, 2015
ADDENDUM 1

We received the following question regarding the bid listed above:

Question # 1: We are currently reviewing your RFQ and wanted to know the scope of engineering related services to be authorized on an as-needed basis.

Answer # 1: Primary engineering services that may be needed on an as-needed basis include, but are not limited to technical assistance with or actual review of site development permit, subdivision, and building permit applications for Water Resource Ordinance compliance, as well as FEMA application review pertaining to LOMA, LOMR, CLOMR, and similar applications pertaining to floodplain development. Other examples include the following:

- The Land Use Department conducts pre-application meetings 3-6 times a week at which attendance may be required to answer engineering-related questions.
- The Land Use Department responds to complaints regarding alleged violations of the Will County Water Resource Ordinance. Technical assistance, including potential site inspections, may be required to assist the Department's Community Development Division to resolve complaints.
- During construction authorized under site development permits, there may be questions or alleged adverse impacts upon adjacent property owners. Technical assistance may be required to address those concerns.
