BID # 2015-62
ROOFTOP MOUNTED PHOTOVOLTAIC INSTALL RFP

ADDENDUM 2
SEPTEMBER 11, 2015

We received the following questions regarding this RFP:

Question # 1: The publication I am with tends to cover P3s that are at least USD 50m in value. I understand this is a competitive process, however would you say that the project would be in the ~50m category?

Response # 1: Because this is an active solicitation where bidders have been encouraged to propose their own unique solutions, it would be inappropriate for the County to provide any comment with regard to contract valuation.

Question # 2: How would the consortiums be expected to finance the project? Are you expecting debt/bond/equity/etc. financing? Or will they be compensated through the PPA, similar to something of a real estate play?

Response # 2: The County has not placed any limitations on the how respondents will finance their projects outside of a stated preference that the respondents seek to sell their SRECs into the Illinois Power Agency auction to allow for some offset of capital expenses on the projects.
