Re: Oversize-Overweight Vehicle Permits for Containerized Grain -
changes starting with permits issued on December 3, 2007

Please be advised that effective December 3, 2007, the following
changes will go into effect:

1. A plastic seal attached to the rear of each container will be required. Each plastic seal will contain a unique permit serial number matching the permit number in the truck.
2. All companies will be required to pickup new permits and accompanying plastic seals at our office. Payment must be presented when permits are picked up.
3. All existing permits must be used prior to December 3, 2007, or if this is not possible call our office to make other arrangements.
