**BID # 2015-62**  
**ROOFTOP MOUNTED PHOTOVOLTAIC INSTALL RFP**

**ADDENDUM 4**  
**SEPTEMBER 16, 2015**

We received the following questions regarding this RFP:

Question # 1: Hello, I know that you specified that the PV Watts tools is required, but we have tried to access the deprecated version of PVWatts that has the ability to adjust the DC-to-AC Derate Factor.

Here are link that used to work:

<http://rredc.nrel.gov/solar/calculators/PVWATTS/version2>

As you can see, those links now re-direct to the current version of PV Watts that uses different inputs. It it not possible to comply with the specific direction as far as we can tell.

We would like to be fully compliant and understand that output values are important, so can you please provide some additional guidance on this issue?

Response # 1: Please use the link below:

<http://pvwatts.nrel.gov/>
